

RELAXATION DENTISTRY(ANXIOLYSIS) PRE-OP INSTRUCTIONS

- Wear loose, comfortable clothing with short sleeves or no sleeves to permit ready access to the arms for monitoring(such as blood pressure cuffs).
- Remove dark fingernail polish prior to dental treatment if possible.
- Tell the doctor of any changes in your health (including but not limited to new medications, recent surgeries, illnesses, etc.) prior to taking oral medication.
- Do not consume alcoholic beverages the evening prior to or for 48 hours following dental treatment.
- Do not eat 6 hours prior to taking the medication. You may drink a little water to take the medication, but keep it minimal.
- All patients must be accompanied to and from the office by a responsible adult. If the procedure is short (1 Hour), the responsible adult shall remain in the office. For longer appointments and at the practitioner's discretion, the responsible adult may leave the office during the appointment and return to assist the patient home. Such parties shall make sure it is ok to leave with the receptionist and leave a cell phone number. Patients may not permit strangers (such as taxi-drivers) to drive or assist them while under medications.
- You will need assistance by a responsible adult with walking and using the restroom.
- You should have a responsible adult stay with you for at least 12 hours following the appointment.
- Take all of your regularly prescribed medications unless otherwise instructed by your dentist.
- You should not ingest any sedatives or caffeinated products 12 hours prior to the appointment unless prescribed or recommended by the dentist.
